Ways to Donate to the Club

There is a simple and painless way to help our club earn funds for our outreach programs. Fred Meyer allows their customers who have personal Rewards cards to

link their card with a qualifying community group. Sign up for the Community Rewards Program by linking your Fred Meyer Rewards Card to the Alaska Bird Club at <http://fredmeyer.com/communityrewards>. You can search for us by our name or by our non-profit number 80283.

Recent Educational Events

One of the most important tenets of The Alaska Bird Club is to provide educational opportunities for the parrot-curious and parrot loving public. To this end, members are encouraged to attend events in and around the Anchorage area that allow us to share information and to support other owners.

On February 1st, the Club participated in the 2014 Pet New Year at Alaska Mill and Feed. This annual event highlights Anchorage pet owners and is designed to share information about all types of pets, not just birds. The Bird Club was there, birds in tow, to provide interested people as much help and support

with their birds as possible. Many thanks to Twiggy and Monkey, feathered overlords of Amber O'Neill and Karen Medkeff, for their participation.

The Anchorage Aces hosted another event for pets during their home games on February 21st and 22nd. The Bird Club was there, along with Twiggy and Monkey, to answer questions from possible parrot owners and from members of the public already in a relationship with one or more birds.

These events are fun and educational, both for Club members and the public. We welcome member involvement in these events.

President's Perch by Garry Wallan

Let's Talk About Sex!

S-e-x. Three little letters that can get people riled up, in a good way or not, depending on the context. When the context involves our pets and their natural instinct to reproduce, we nod our heads in logical acceptance, or helpless toleration, of our female dogs and cats who have been “in heat” or our over-zealous male dogs who gratify themselves in all the wrong places.

When it comes to our parrots, often the head shaking is out of confusion, or as if to say “Whaaa? Parrots? Really?” Yes. Parrots. Really. As mammals, many of us are more familiar with the male and female “barnyard” mating rituals than with those of our avian friends. Their behaviors and instinctive “turn-ons” are generally different than those of which we are more familiar.

As with all other parrot behavior, mating behaviors need to be looked at as a set of body signals and actions, part of the overall Parrot Body Language that is so important to learn when trying to tell the difference between a happy parrot, an angry parrot, and in the case of s-e-x, a reproductively motivated parrot. Ignorance of these signals can lead to unpleasant and unwanted behaviors which often include screaming and biting.

At the April educational meeting of The Alaska Bird Club, I will be the guest speaker, and my presentation will be about “Sex and the Single Parrot.” There are many aspects of our birds’ sexual lives that we, as responsible parrot slaves, need to be aware of to make for a happier home.

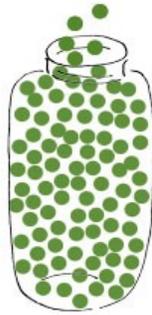

This will be a frank, PG-13 discussion, so kids, if you think your parent or adult guardian can’t handle the topic, perhaps having The Talk beforehand might be a good idea.

2014 Pick. Click. Give.

From now until the end of August, you can donate a portion of your Permanent Fund Dividend to one or more Alaskan non-profit organizations. If you signed up on-line, you are probably already aware of this program. If you wish to participate, go to the PFD website at <http://www.pickclickgive.org> where you will be guided through the process of donating any amount you choose to a worthwhile program. The Alaska Bird Club is one of many excellent non-profits you can choose to support. Please, Pick. Click. Give. gener-

Birds Available for Adoption

See www.petfinder.com for details

Sarge is a DNA sexed **female Senegal parrot hatched on 6/01/08**. She was purchased from PETCO about 4 months after she was weaned and she has had the same owner since. She has been to the vet for well bird exams several times and has had bloodwork in the recent past (normal results) and she has no health/behavioral issues (feather plucking etc). Her leg band has been removed and she has an AVID microchip.

Sarge has been on Zupreem natural pellets and occasional fresh vegetables and fruit since she was weaned. Her favorite veggies are red bell peppers, carrots, and peas. She enjoys bananas and slivered almonds as treats. Sarge can be rather talkative and greets most people with a "Hi" when they enter the room. She makes several interesting noises and mimics a few household appliances as well as a persons sneeze. Sarge has been housed in the same room as a Sun Conure for most of her life. She does not get along with him.

Chic Chic Scarlet Macaw

Chic Chic is a close to 30-year-old, pretty mellow, scarlet macaw. She has a small, clear vocabulary. Chic Chic "dances" to music with a good beat, and a lot of the time displays rhythm, too! She started plucking her chest at about 10 when her first owners separated her from and then sold her "mate." (They thought both were boys at the time.) She is pretty much bald-chested, full-time. She lived with her new scarlet buddy, until his death 9 years ago. If not another macaw buddy, then she primarily prefers male humans, but occasionally feels a female is acceptable. Thought the best placement would be with another "buddy" macaw, but she might potentially be a pet bird again with the right person, (most likely a man,) and a lot of work. Although she is well cared for, she lives a pretty boring life, as she doesn't play much with toys, chew much, or connect with other non-macaw parrots. For more information about her, contact 696-6800.

Birds Available for Adoption, continued...

PeeWee Conure

PeeWee is very vocal, his wings are not clipped, and he was allowed to fly around our apartment, although he's pretty lazy and would only occasionally fly. He likes to hang out on our shoulders and enjoys being in the shower. He has on several occasion bitten me fairly hard on my ears, but never my husband. He has a pretty large cage that would go with him, as well as all his toys and any food that we have left."

Finches

There are about 16 finches here that need good homes. They are zebra finches. they lived in the hallway of an elementary school for a while and have been displaced due to student allergy concerns. The current foster home would love to adopt them out as one group, but would be fine letting them go in smaller groups.

If you're interested, please contact the Alaska Bird Club at akbirdclub@yahoo.com or call 907-868-9070.

Quakers and Cockatiels

A pet shop in Soldotna closed down, leaving a room full of free-flighted quakers and cockatiels needing homes. Some of the birds are missing toes and feet due to the free-flight situation (landing on bigger birds' cages). These birds need homes ASAP.

Yoyo is a **32** year old *hand fed male* baby, born in **1982** with only one owner. He prefers men over women and has a good vocabulary, no profanity.

His cage is his territory. Always left out. His wings are not clipped and he doesn't scream, but can be noisy.

Yoyo is good with dogs and children. He grew up with my sons, but that was a long time ago.

His diet is varied, seeds, veggies, fruit, a little pasta & cheese. At one time he was trained to fly to me, but, again, that was a long time ago. Prefers his cage. If he flies off, he can be picked up to go back to his cage or he will fly back on his own.
